List 1 Different aspects of Vedic Mathematics

Aspect 11

Organization format features of text of Ganita Sutras and Upsutras

1. Aadi Chakra (beginning cycle)
2. Transcendental formulations of values 1 to 29
3. Ten folds basis formulations
4. Upnishads
5. Sathapatya format feature (1 to 12) and formulation Shiv

Upnishads

1. Mandalbrahamano Upnishad
2. Mansara chapter 2.34 (II), 2.38 (1)

Upnishads⁽¹⁾ values are the essence of Vedas. Upnishads put sadkhas on the format of three folds features (1) बर्हिलक्षण / external (2) मध्यलक्षण / middle and (3) आन्तरिकलक्षण / internal. Mansara⁽²⁾, scripture of Sathapatya upved of Atharavved, preserves that Vishnu is the presiding deity of measuring rod, Vasuki Nag is presiding deity of measuring rope (रज्जु), while Brahma is the presiding deity of measurement.

External features (बर्हिलक्षण)

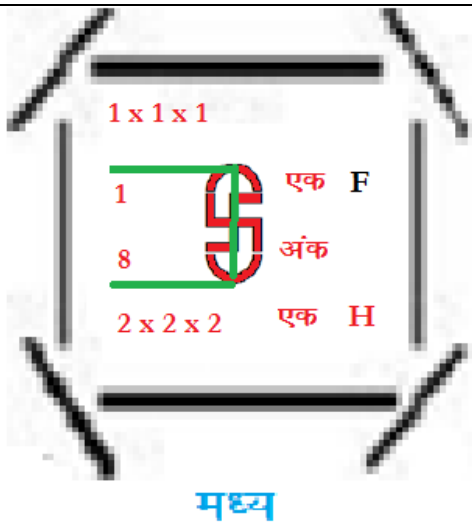

Formulation (बर्हि-लक्षण) is of TCV 21 + 22. The values pair (21, 22) is parallel with the TCV values pair of pair of formulations (पूर्व, पश्चिम्) / east, west. The external characteristics of shad chakras are (2, 4, 6, 8, 10, 12) parallel to the boundary components of Hyper cubes 1 to 6 synthesizing Sathapatya measuring rod presided by Vishnu. Brahma is the presiding deity of measurements. Four head lord Brahma is the overlord of 4-space. lord Brahma meditates within cavity of his own heart and with grace of Transcendental lord Shiv, Brahma multiplies as ten Brahmas in Shiv lok. Along Sathapatya format, this amounts to transition from 4-space as domain to 4-space

as boundary of 10 components of 5-space. Sequentially the transition ahead is from 4-space as boundary of 5-space to 4-space as dimension of 6-space. It is the reach at middle (मध्य), and step ahead the transition is going to be within 6-space and it is going to be of inward (आन्तरिक) transition features
