

Aspect 23

**CHATUSHPEETH**

**CHATUSHPEETH**

**चतुष्पीठ**

---

Lord Brahma, creator, the supreme is a four head lord. His each head is equipped with a pair of eyes. He sits gracefully on a lotus seat of eight petals & mediates within cavity of his own heart at the seat of transcendental lord Shiv.

These features of idol of Brahma manifest as hyper cube 4, the representative regular body of 4-space.

With the grace of transcendental lord Shiv, Brahma multiplies as ten Brahmas and the lotus seat of Brahma transits and transforms into Chatuspeeth.

The transcendental phenomenon of transition and transformation of lotus seat (hyper cube 4) results into **re-manifestation** for the four folds of hyper cube 4 of quadruple values (2, 3, 4, 5) of summation value 14 as **hyper cube 14 of 29 versions** which make the transcendental code value of formulation Brahma being 29.

This transition from manifested (**static state**) into transcendental (**dynamic state**), results into value 30, one more than 29, parallel with the transition from the **spatial order** of 4-space transiting into **solid order** 5-space.

This goes parallel with transcendental code value of formulation chatuspeeth being 30, which is also parallel with summation value of four folds (6, 7, 8, 9) of **hyper cube 8**, the representative regular body of **8-space** (asht prakarti) of **nav Braham** (9-space) as origin.

To be parallel with these values is going to be the second learning step for entering the Shri Vidya Kshetra.
