

Aspect 29

TRANSITION FROM SPATIAL ORDER  
TO SOLID ORDER

**TRANSITION FROM SPATIAL ORDER  
TO SOLID ORDER**

The transition from spatial order to solid order, amounts to re-manifestation and also from static state to dynamic state.

The solid boundary with its take off manifests outer space with 6-space as an origin (3, 4, 5, 6), and in second phase as (6, 7, 8, 9). This two phased phenomenon deserves to be comprehended and the same also to be imbibed fully.
