

Sri – Om

VEDIC MATHEMATICS AWARENESS YEAR

Awareness evaluation quarter (1-7-15 to 30-9-15)

Organizers: Dr. S. K. Kapoor, Sh. Rakesh Bhatia, Sh. Bhim Sein Khanna, Sh. Deepak Girdhar
E-newspaper issue no 241 dated July 07, 2015 / Awareness quarter issue no 7
For previous issues and further more information visit at www.vedicganita.org

AIM

Formation of

VEDIC MATHEMATICS SCIENCE AND TECHNOLOGY UNIVERSITY

*Think Meditate Transcend, Glimpse and Imbibe Format Features Order
Values and Virtues of Vedic sounds formulations along Sunlight Carriers*

AWARENESS EVALUATION STEPS

1. LET US FOLLOW TRANSCENDENTAL CARRIERS OF SUNLIGHT
2. TRANSCENDENTAL (5-SPACE) DOMAIN AS FOUNDATION FORMAT
3. CREATION 4. SELF REFERRAL (6-SPACE) CREATION FORMAT
5. VEDIC MATHEMATICS 6. VMS & T BOOKS

7

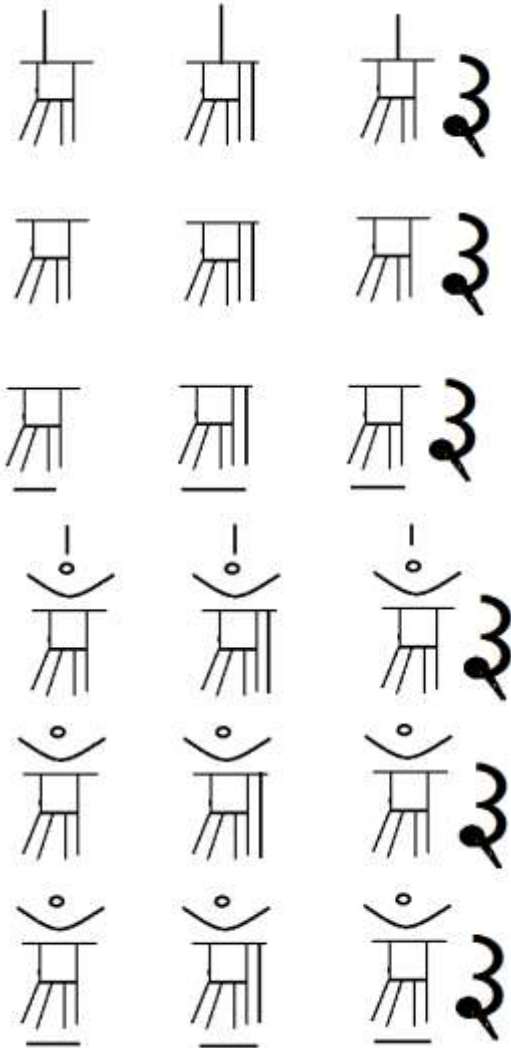

Formation of

Vedic mathematics, Science & Technology University

Let us revisit our ignorance about ourselves, Universe
and Vedic knowledge and its processing systems

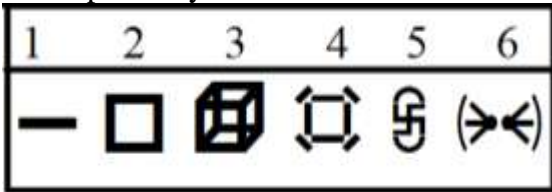

1. Vedas, despite its transcendental (5-space) values base and perfect processing systems are being not given place in present day 'education' and main stream schooling.
2. One excuse being taken shelter by the modern scholars is that these systems are of ancient times and are in dormant state for last many centuries and as such

- making it a part of main stream schooling is just unpractical and unfeasible.
3. The consistent view of knowledge seekers throughout all these centuries has been that Vedas are the treasure house of knowledge, wisdom and enlightenment and that the ignorance level under the current approach to knowledge systems all these centuries have simply deepening our ignorance about the reality of our Existence Phenomenon as well as about our universe.
 4. Taking enlightenment and ignorance as opposite poles, the understanding of the range in between will naturally require proper comprehension and appreciation of both, enlightenment as well as Ignorance, and for it one shall pose this to oneself and have a fresh visit about one's own enlightenment level and also about one's ignorance state.
 5. For it, one shall sit comfortably and permit one's transcending mind to think, meditate, transcend and glimpse about one's enlightenment level as well as about one's ignorance state.
 6. One shall enter upon this exercise continuously over number of times in the form of prolonged sitting of deep trans and in between two such sittings one may be through the experiences of senior sadkhas preserved in the literature reaching us and to evaluate the same in the background of Vedic knowledge preserved with us in the form of Vedic literature
 7. One may as per as own intellectual growth shall revisit Vedas of samhitas to upnishads range in the light of the values chase thereof and preserved with us as Vedantatri (upnishads, Braham Sutra and Srimad Bhagwad Geeta)
 8. More one shall be being through these self evaluating sitting of trans, more one shall be coming nearer to reality of one's own enlightenment level and ignorance state.
 9. This light of self evaluation of one's own enlightenment level and ignorance state , one can realistically interact with others and reach at the conclusion for the necessity of formation of Vedic mathematics, Science & Technology University
 10. VMS & T Discipline chases values essence of Vedic knowledge processing systems which are of two folds being designated and known as Sankhiya Nishtha and Yoga Nishtha
 11. Sankhiya Nishtha presumes the existence of geometric format and avails artifices of numbers, while on the other end presumes the existence of artifices of numbers and avails dimensional frames.
 12. The poverty of the modern system may be index in terms of its functioning, only in terms of a three dimensional frame of three linear axis. While on the other hand, the richness of the Vedic Systems is of transcendental (5-space) spiral progression format as that the whole range of dimensional order are avaiabe and in face being utilized by Vedic Systems.
 13. The ignorance level of the modern system is further exposed as that these systems do not have dimensional synthesis values Mathematics.
 14. Let us come nearer to our initial stages of main stream schooling.
 15. Let us revisit as to what is being taught about 3 about first letter of the alphabet
 16. First letter 'अ' is of the sound frequency format (अकार) / Akara. It is the first vowel. It is also a syllable (अक्षर). There are 18 phases and stages of its forms and formats as under

17. Let us pose to ourselves as to present day schooling at all is any way nearer to above values even in respect of the first letter of the alphabet
18. Our ignorance and neglect of Vedic knowledge is very deep and its depth is unfathomable level.
19. Vedic knowledge is of Sakala Rigved Samhita is the oldest book of mankind is the source book of Vedic knowledge. It is a scripture of ten mandals, eight austak, eighty five anuwaks, 1028 suktas, 2024 vargas, 10552 richas, 432000 akshtras of which 397265 are written akshtras and remaining 34735 are unmanifest akshtras
20. Inner evidence of available Vedic literature enlightens us that there are four Vedas namely Rigved, Yajurved, Samved and Atharavved.
21. Rigved has 21 branches. Yajurved has 101 branches. Samved has 1000 branches. Atharavved has 9 branches. Each branch has distinct samhita, Brahmana, Arnik and Upnishad and this makes Vedic knowledge as of 4524 scriptures.
22. In addition there are four upveds : Ayurved, Dhanurved, Gandharavved and Sathapatyaved
23. Over and above them there is a big volume of processed values of pure and applied knowledge which constitute Discipline of Vedic mathematics, Science & Technology Discipline.
24. Vedic mathematics, Science & Technology (VMS & T) Discipline chases values – essence of processing systems of Vedic knowledge.
25. At base of organization of Vedic knowledge is Vedic mathematics, Science & Technology Discipline.
26. Vedic processing systems format is of two fold features, designated and known as Sankhiya Nishtha and Yoga Nishtha.
27. Sankhiya Nishtha presumes existence of geometric format and avails artifices of numbers.
28. On the other hand, Yoga Nishtha presume the existence of artifices of numbers and avails dimensional frame
29. Vedic knowledge settles Sathapatya measuring rod presided by Lord Vishnu and its measure is presided by Lord Brahma creator the Supreme.
30. Lord Vishnu is the presiding deity of 6-Space while Lord Brahma is the presiding deity of 4-space
31. Sathapatya measuring rod chases the transcendental (5-space) carriers presided by Lord Shiv, the transcendental (5-space) lord.

32. These values of Sathapatya measuring rod are parallel to the values and virtues of format and features of Trimurti (Lord Brahma, Lord Shiv and Lord Vishnu) for sustenance of Existence Phenomenon of Triloki.
33. 'Triloki and Trimurti' together constitute the basis of manifested creations being of four folds permitting transcendence therefrom for space content to be carried by transcendental (5-space) carriers of Sunlight.
34. Transcendental (5-space) carriers carry black matter from pole star by transcending through orb of Sun manifests range of five basic elements array (space, Air, Fire, Water and Earth).
35. And other way round, transcendental (5-space) carriers carry space content of its all phases and stages of its manifested from back to the orb of the Sun.
36. VMS & T chases values of the format and features of the transcendental (5-space) carriers of its both ways.
37. This chase follows the synthetic format of hyper cube 1 to 6 being the representative regular bodies of 1-space to 6-space respectively.

38. Along these geometric formats set up are chased the artifices of numbers organized along the Dev nagri alphabet format as under

Devnagri alphabet format

Transcendental code values format

Sole syllable Om ॐ

TCV value 16

Vowels

Letter अ इ उ ऋ लृ ए ओ ऐ औ

TCV values 1 2 3 4 5 6 7 8 9

Thy synonym is Parnava.

(Tasey Vachka Parnava) प्रणवः

TCV value 36

39. Let us have a pause here and pose to ourselves whether modern systems have mathematical tools of artifices of numbers and dimensional frames chase solar universe and our Existence Phenomenon within Human Frame coordinated by Shad Chakras format of external characteristics values array (2, 4, 6, 8, 10, 12) parallel to boundary components array of hyper cubes 1 to 6 settling the format for this sathapatya measuring rod?

40. This all will convince us that there is immediate need of formation of full fledged Vedic mathematics, Science & Technology University and chain of colleges and school under it to educate young minds of values of Vedic knowledge, virtues of Vedic wisdom and vision of Vedic enlightenment.
