Week – 6

Three points fixation of an interval

Chase Step 16: Three point fixation of an interval

1. The consecutive chase attainable in terms of a three dimensional frame (i) as synthesis value of all the three dimensions (ii) as synthesis value of pair of dimensions and as (iii) synthesis value of single dimension as of artifice '136', that way amounts to a three point fixation of being 'consecutive'.
2. NVF (Consecutiveness) = 193 = NVF (Entity Discipline) would further help us have an insight about the format and features of being consecutive as entities Discipline in sleep state.
3. NVF (linear consecutiveness) = 252 = NVF (ultimate full Discipline)
4. As such, it is three point fixation of the ultimate / interval which deserves to be chased to acquire insight of the split and synthesis of phenomenon of new Eco spheres
5. Here it would be relevant to note that NVF (Eco) = 23 = NVF (End)
6. NVF (New Eco) = NVF (New end) = NVF (Center)
7. Still further $23 = 3 + 5 + (3 \times 5)$ shall be focusing upon the super imposition feature of Transcendental domain (solid order 5-space)
8. Here further it would be relevant to note that NVF (H) = $8 = 3 + 5$
9. NVF (Insight) = NVF (New space) = NVF (five space seal)
10. Here it would be relevant to note that NVF (Eight) = NVF (five space).
11. That Hyper cube 8 accepts boundary of 16 components while fixation of domain of hyper cube 8 within dimensional frame shall be leading to $6 \times 8 = 48$ coordinates and this feature shall be leading to fixation of each of the 16 boundary components of hyper cube 8 in terms of triple coordinates.
12. One may have a pause here and permit the transcending mind to continuously remain in prolonged sitting of trans to have an insight about three point fixation for the origin of sphere / Eco sphere / new Eco sphere and thereby having settlement of the Transcendence path through origin of the sphere and thereby there being the attainment of split for the spheres into hemispheres and re-synthesis for the hemisphere as sphere.

*

Chase step 17: Fluctuating middle point

1. The three point fixation of transcendence path through origin of the sphere as such shall be making origin itself as the middle fluctuating point of the transcendence path.
2. It would be blissful to chase format and features of origin of the sphere as middle fluctuating point of the transcendence path along which the sphere permits split into a pair of hemisphere with each hemisphere itself as well being the Ecosphere.
3. Further it also would be blissful to glimpse the synthesis of Eco-spheres as of the format and features of new hemispheres into new Ecosphere.
4. It is this Transcendental phenomenon which deserves to be chased.
5. It is this Transcendental phenomenon which deserves to be comprehended well.
6. It is this Transcendental phenomenon which deserves to be appreciated completely
7. It is this Transcendental phenomenon which deserves to be imbibed fully.
8. The bliss of being face to face with this Transcendental phenomenon is to make the transcending mind being the self referral mind attaining unity state of its own.

*

Chase step 18: Part as whole

1. It would be a blissful exercise to permit the transcending mind to work with 'part' as a whole.
2. It would be parallel to working with '2 as 1' and '1 as 2'.
3. It would further be parallel to working with any interval, big or small, being a complete linear order.
4. It would be parallel to working with any unit as whole of the domain.
5. It would be working with the domain as a structured point.

*
