

V.M. COURSE

VEDIC ARITHMETIC

About This Course

Vedas are Ancient Wisdom reservoir. Vedic Knowledge System (VKS) approach **Existence Phenomenon** of Solar Universe as a unified Discipline of knowledge. The uniqueness of this system is that it successfully makes it a 'Speaking language system'. Withit, Human articulated sounds emerge as a medium of inherent potentialities of it's natural transission from **sound frequencies into light frequencies**.

Vedas have reached us as a 'grammarised speaking language' of Devanagari Alphabet of compactified formats of five folds, namely:

(i) Letters (ii) Numbers (iii) Sathapatya (Geometric formats) : (a) Space content (b) Full unit body and (c) Half unit body manifestation within spatial order 4-space .

Here in the present course, the focus is to remain upon the second (numbers) fold, which makes a **Discipline of Vedic Arithmetic**.

The attempt being, the first of it's kind, in the '**Present Time**', and as such, it's limitations, be appreciated and accepted. And, this appreciation and acceptance, I feel, is bound to fulfil us with the **Bliss of Ancient Wisdom**.
